

# Veolia Water Retail (UK) Ltd

## *Scheme of Charges - Tidworth Exit Area - 2024/25*

### **Introduction**

This Scheme of Charges shall outline the Charges applicable to Non-Household customers of any Eligible Premises in the Exit Area.

These Charges are effective from 01 April 2024 and exclude VAT.

**Water Charges** - Water charges are payable for all non-household properties which receive a water supply either directly or indirectly.

**Wastewater Charges** - Wastewater charges are payable for all non-household properties connected directly or indirectly to a public foul or surface water sewer or which have the benefit of these services and will include elements of foul water, surface water and highway drainage.

For customers with a water meter, the wastewater volume is, in general, determined by reference to 95% of the volume of water recorded by the water meter. If you believe that significantly less than this amount of water returns to the sewer at your property, please get in touch with our team.

Non-household customers not connected to the sewer for discharging surface water can apply for an abated charge.
